

Your INL Update — Week of Feb. 1, 2010

This is Misty Benjamin with your INL Update.

Battelle Energy Alliance is supporting excellence and innovation in science, technology, engineering and math (or STEM education) with an Extreme Classroom Makeover. Two Idaho classrooms will be awarded grants for \$10,000 to support instructional resources, materials and lab equipment.

Gov. C.L. “Butch” Otter joined Idaho National Laboratory leaders and scientists to celebrate INL technology at the INL Honors Banquet Jan. 29. At the ceremony, Robert Fox was named Inventor of the Year and Chris Morgan Technician of the Year. Other award recipients included Bruce Mincher, Steven Herrmann and S. Blaine Grover.

INL is taking a closer look at vulnerabilities of industrial-scale wireless control systems. Wireless technology is less expensive than cabled systems, making it an attractive option to industry, but there are some questions about the security of those systems. Learn how INL is strengthening those electronic bonds at INL.gov.

This was your INL Update. You’ll find more information at INL.gov, including community announcements and the latest INL news.
